SUMMARY

Results-driven Software Architect and Senior Software Engineer with 10+ years of experience designing scalable cloud and enterprise systems. Proven track record leading cross-functional development teams, modernizing legacy infrastructure, and delivering data engineering solutions. Adept at bridging technical execution with stakeholder communication across industries including finance and industrial automation.

SKILLS

Languages: Java, Python, Jython, JavaScript, SOAP/REST, Bash/Shell Scripting, HTML/CSS

Applications: Control-M, DBT, SQL Developer, Weblogic, Oracle Identity Manager, Inductive Automation Ignition

Cloud Technologies: Amazon Web Services (EC2, S3, Sagemaker, IAM, Cloudability), Terraform scripting, Snowflake Data Cloud

Dependency Management: Maven, Gradle, JFrog Artifactory, PIP, Poetry

DevOps Technologies: GitHub Actions, Openshift 3/4, UrbanCode, JFrog Xray, Docker, Splunk, ElasticSearch/Kibana

Java Technologies: Java with OOP, Spring Framework, Spring Boot

JavaScript Technologies: Node, React

Development Tools: SVN, Gitlab, Github, Eclipse, IntelliJ, VScode

Project Tracking Tools: CA Agile Central, Rally, Jira, Wrike

IT EXPERIENCE

Global Process Automation (GPA), Ruston, LA

Software Architect

March 2024 – April 2026

- Led the team through multiple projects ensuring we stayed focused and were always moving towards a clearly defined goal.
- Mentored other developers, providing insight and learning opportunities that improved the whole team's efficiency.
- Created a change request system utilizing Jira and Confluence to provide the customer with an easy but structured way to present desired changes to the team so that needs could be addressed quickly and accurately.
- Standardized documentation for the system and our processes to help enforce a more organized workflow and ensure clear expectations were set for all parties involved.
- Deployed and configured the system across 5 sites through regular communication with key points of contact for each site.
- Designed a system that met customer needs, while remaining maintainable and scalable.
- Learned the industrial automation development ecosystem and immediately started delivering valuable output.

USAA, San Antonio, TX

Senior Software Engineer

Software Engineer I

Jan 2022 – March 2024

May 2019 – Jan 2022

- Served as Tech Lead for a data engineering team working on automation efforts for data migration to Snowflake using Python and DBT.
- Worked within Bank Risk and Business Controls to integrate a document controls solution.
- Served as Tech Lead leading a team of developers to streamline agile workflows, develop and enforce expectations for work coming from the program layer, review code, mentor junior developers, interview new hire candidates and manage developer workloads.
- Led effort to develop a new AWS cloud platform for Bank Machine Learning and Data Science use cases.
- Migrated multiple legacy applications to a new tech stack and existing modern applications to a new datacenter.
- Regularly collaborated with architects and lead developers on system design.

CENTURYLINK, Monroe, LA

January 2015 – May 2019

Software Developer

- Developed connectors, schedulers and other access management tools with Java through Eclipse using Oracle Identity Manager's API and GUI.
- Used Oracle SQL Developer and JDBC to query and manage backend user data in OIM.
- Regularly interfaced with multiple AD domains through LDAP to create unified user data pulling from and pushing to each of these domains.
- Implemented REST API calls to facilitate data transfers for managing new domains in OIM.
- Managed users and groups on over 5000 UNIX servers through a custom java interface using Oracle's UNIX Connector.
- Utilized Apache's Active MQ and Java Messaging Service to create an efficient interface with 27 IBM Mainframes for the management and provisioning of user accounts on said mainframes.
- Created shell scripts for log management and jar execution scheduled in the crontab
- Monitored logs across a clustered UNIX environment and resolved helpdesk tickets daily.

CENTURYLINK, Monroe, LA

Summer 2014

IT Intern

- Joined the project team creating and updating human resource software to aid in internal evaluations and progress development.
- Assigned to apprenticeship challenge intern team tasked with conceptualizing products to market to customers of CenturyLink.
- Completed intern training associated with business analysis within organization.

EDUCATION

LOUISIANA TECH UNIVERSITY, Ruston, LA

Bachelor of Science, November 2014

Major: Computer Science

Minor: Economics
